

In the last 12 months:

- 2 new Partners
- 3 salaried GPs
- 3 Pharmacists
- 2 Paramedics
- 2 Practice nurses

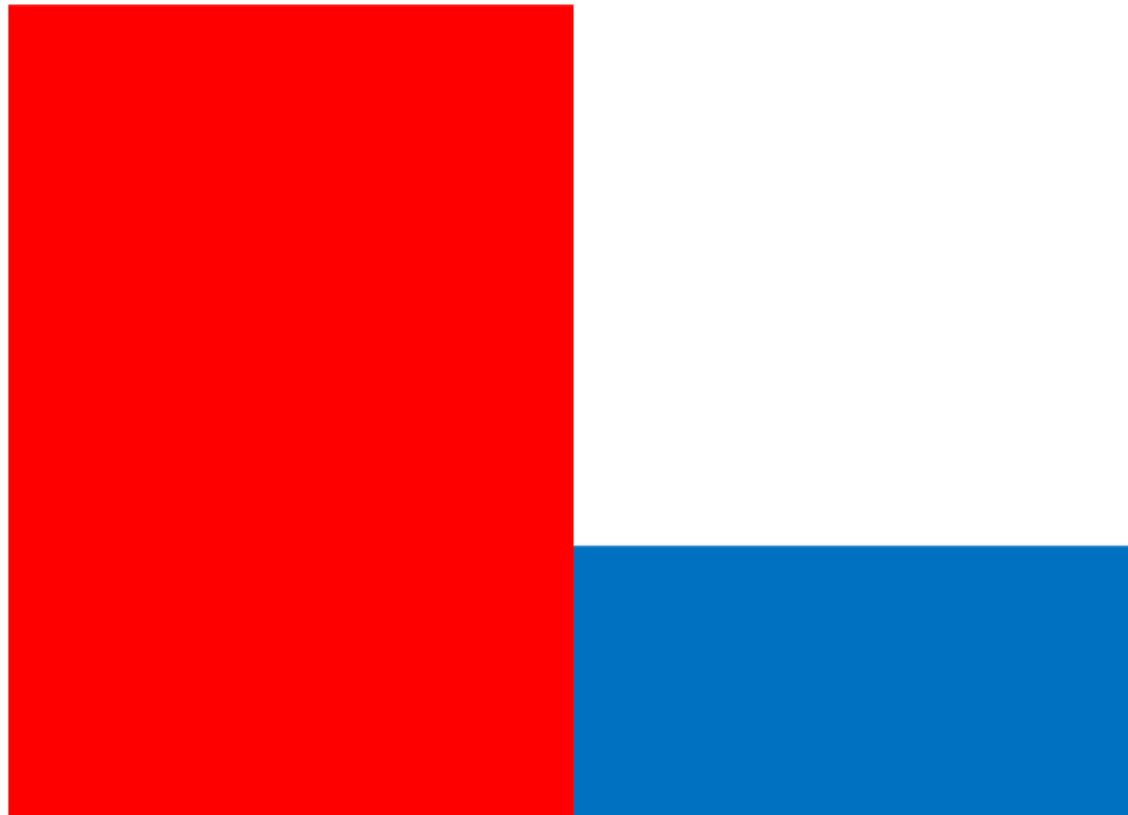

Patient Outcomes

- Practice pharmacist/Head of Prescribing
- Utilise skill mix: e.g. Palliative care, diabetes, substance misuse team, dermatology, orthopaedics
- Care Homes – efficient and better care
- Reduced hand-offs.
- Social care, voluntary sector input
- SEAs/Mortality Reviews
- Complaints process/leadership

HOSPITAL ADMISSIONS

■ 6 months prior to Planned visits

■ 6 months following Planned visits

Efficiencies

- Reduced bureaucracy and hand-offs
- Look for win-wins
- Better primary care access but not solely GPs
- Prescribing (reduced by £230k in 15/16)
- Reduced Admissions (£230k Q1)
- Telephone system/hub approach
- Whole system view
- Relentless dissatisfaction

- 
- ‘I wanted to work in a large team, do new things and not be isolated as a GP.’
 - ‘There’s real energy for change, and ideas are implemented quickly.’
 - ‘I like working in a large practice because there’s great support and I’m free to focus on what I’m trained for and enjoy.’
