Themes: Public Sector Services

Aimed at: All People

Here at New Boiler Grant, we work closely with a large number of UK installers to address the surrounding issue of energy company obligations for vulnerable households. We've helped thousands of people who do not have enough funds to obtain free grant boilers.

Our boiler replacement scheme service is completely free of charge. Once you have completed the information required below we will refer your grant boilers enquiry to one of our authorised installers in your area.

The installers will first carry out a survey before they proceed with the installation. We, at New Boiler Grant will always monitor feedback to ensure each installer provides the best possible level of customer service for you.

Struggling to heat your home?

In the colder months there are millions of homeowners and private tenants who struggle to keep their homes heated.

On average, a boiler replacement could cost around £1000-£3000. This is a very costly figure for lower-income families to source.

The boiler replacement scheme helps those families to save on their energy bills and reduce their carbon footprints. The replacement process requires a brand-new A rate boiler replacing the old existing boiler.

Area: Bassetlaw, Bolsover
