Themes: Advocacy, Care and Carers

Aimed at: All People

When illness or disability strike, a lot of people can feel the impact. Suddenly it can seem as though life is on lockdown — whether it's you being cared for, or you're providing care to somebody else.

Our aim is to help unlock doors; opening up the world again so that you can re-connect with others and make choices that enrich your life.

At TuVida, we know that there is no 'one one-size-fits-all' formula for effective care and support. It's our aim to offer the best, most appropriate care and support to people who need it.

We provide one-to-one care and group support for adults and children with a wide variety of needs and conditions, at home and in the community. This also provides unpaid carers with a valuable break.

Our vision is to see a world where every carer can live life with independence, choice and peace of mind.

To help achieve it, we draw on a combined organisational history of more than 150 years offering high quality care and support across England.

Area: Bassetlaw
