Aimed at: All People

DEBRA is the national charity that supports individuals and families affected by Epidermolysis Bullosa (EB).

What is EB?

Epidermolysis Bullosa (EB) is a group of genetic skin conditions that cause the skin to blister and tear at the slightest touch.

There are many different types of EB, ranging from the mildest, in which only the big toes are affected, to the most severe, which can have a devastating effect on any part of the body, causing lifelong disability and pain, and in some cases can sadly be fatal.

Find out more about EB and the different types below.

Area: Bassetlaw, Bolsover
