Themes: Advocacy, , Bereavement and Grief, Counselling

Aimed at: All People

Meningitis Research Foundation is a leading UK, Irish and international charity that brings together people and expertise to defeat meningitis and septicaemia wherever it exists.

Our vision is of a world free from meningitis and septicaemia. A world where effective vaccinations can protect everyone. A world where people who do get the diseases get the most effective diagnosis and treatments possible. A world where people affected and their families have the best support and information.

We have three goals:

- to see fewer people get meningitis and septicaemia;
- to see more people survive with a better quality of life and reduced disability;
- to have more engaged, informed and supported patients and communities.

MRF plays a key role in making this happen in the UK, Ireland and around the world by funding vital research, advocating for change as a dedicated champion for those it affects, and taking action that benefits people, including running awareness campaigns, training health professionals and providing support and information.

Area: Bassetlaw, Bolsover
