Themes: Advocacy, , , , Physical Disabilities

Aimed at: All People

Our Multiple Sclerosis (MS) Nurse Specialist Service provides:

Nurse-led clinics problem-solving, assessment, lifestyle advice, support.

Symptom management

Initiation and monitoring of disease modifying treatments (where appropriate)

Patient information programmes

Sign post to other disciplines/agencies, for example physiotherapy, speech therapy, occupational therapy

Advice and education sessions for professionals as well as patients

Our MS specialist nurses can also be present at consultant and multi-disciplinary clinics.

How we help:

If you have a question about your MS or treatment options

If you are concerned by any symptoms you are experiencing

If you think you may be having a relapse

If you are finding it difficult to cope with any aspect of your MS

Prescribes and advise on medication

We are also able to offer:

Clinic appointments (Hospital and Community)

Face to face appointments, either in the patient's home or wherever they may be, including in hospital (if appropriate)

Telephone advice

Who can use our service

In order for people with MS to use the service, they must be under a consultant neurologist or clinically isolated syndrome.
