Themes: ICT and Digital

Aimed at: All People

NCSC's guidance is aimed at helping UK government departments, agencies, the critical national infrastructure and its supply chains protect their information and systems. It also has relevance for local government and the wider public sector. The NCSC provides a single point of contact for SMEs, larger organisations, government agencies, the general public and departments. We also work collaboratively with other law enforcement, defence, the UK's intelligence and security agencies and international partners.
