

POV Case Study

Headline: Church Graffiti Workshop

Why we took part

We decided to take part to help the young people of Doncaster and give them something to do. Sadly a lot of young people in Doncaster find their way by seeking crime. So this was a way to try and prevent this from happening.

How POV has helped our organisation

Since working on this project I have worked with over 20+ young people and I feel it has made a helped these young people and given them something to focus on. I was given this project in January and it was very slow to start. But when I started the ball rolling it progressed fast. I have made some great connections through the whole of Doncaster and also within the hotels which house the asylum seekers. We feel like we know the young people well and understand what they want.

Quote

We become stronger when we work as one, no matter who or what you are

Key outcomes and impact:

1. I've worked with 20+ young people, which has helped with their mental health and wellbeing
2. I understand what the young people want and need, also listen to what they have to say
3. This project has helped loneliness and I've included the minority groups we have in Doncaster
